

Goods and Services Policy

At **Grupo Piñero** we firmly believe in the importance of purchasing locally so as to make a direct contribution to the development of the communities where we operate, while also making us a more sustainable business. We establish the following commitments to achieve this:

- As far as possible, purchase **products** manufactured and/or grown locally and in accordance with sustainable criteria.
- Prioritise purchases of products that **minimise the generation of waste** through wrappers and other packaging, encouraging as far as possible the acquisition of goods that are supplied in bulk and sustainably produced.
- Value and purchase **high energy efficiency products** so as to reduce energy consumption.
- Establish mechanisms for the **selection of suppliers** who work with sustainable criteria in their goods production, packaging and transportation processes.
- Use products that comply with the **legal** hygiene and environmental requirements.
