

GRUPO PIÑERO

ETHICAL
CODE 2019

March 2019

Dear staff members,

Being part of the great Grupo Piñero family is and must always be a source of pride for us all, but it is also a great responsibility as our collective commitment to honesty and integrity is ultimately demonstrated and highlighted in the individual attitudes of each team member.

In order to ensure and promote that everyone at Grupo Piñero acts in an ethical and responsible way, we have approved the company's first code of business ethics.

This key document for our organisation establishes our corporate values and the basic principles that must guide not only our day-to-day work, but also the interpersonal relationships we establish on behalf of the group and that we maintain with our environment.

Ethics, a cornerstone of our company, is a net generator of trust among our employees, customers, suppliers and society in general, and it must also guide us to becoming a responsible company that actively contributes to sustainable development.

That is why this code is so important: because it is our roadmap so that the values which define us flourish in our day-to-day, whatever that is, and it must guide us on how to act in especially complicated ethical situations.

To ensure that this code is applied rigorously and taken on board by everyone at the organisation we are committed to disseminating it on all our channels, as we must all understand it to continue building a company we can all be proud of.

Thank you for your attention and see you soon,

Encarna Piñero García
CEO of Grupo Piñero
